# Mobile Developer

Are you an experienced mobile developer, capable of developing applications compatible with mobile phones and tablet computers? I'm seeking an experienced Senior Mobile developer to join my clients team along side other Senior developers and engineers to develop a native technology stack.

Your role will consist of primarily developing mobile applications and how they can integrate with back-end services. This will  involve but not limited too: design, problem solving and the creation of developing clean, quality applications.

As one of the Senior Developers in this team, you will have sole responsibility for the engineering and evolution of the application you will be developing.

**Technical Skills:**
- iOS and Android Platforms
- iOS Native SDK
- Andorid SDK
- iOS Networking
- Objective-C or Swift
- Cocoa Touch
- Familiarity with RESTFul API's
- C# using Visual Studio

For your application to be considered, you will have a Degree in Computer Science or a related field.
If this sounds like the role for you, please get in contact with me to have a confidential conversation about this role in further detail.
